

Push sweepers and vacuum sweepers
Clean surfaces whatever the weather

Wetrok Sweeper:

Two effortless push sweepers

Smaller to medium-sized areas can be removed of all kinds of dirt in no time at all with these push sweepers. The double sweeping system with two disc brushes and sweeping roller makes it possible to remove dirt from two cleaning cycles in just one pass. From leaves and biscuit remains to aluminium cans. The Turbo Sweep 77 Plus and Master Sweep 97 Plus models not only specialise in outdoor surfaces, they also leave storage rooms and industrial areas immaculately clean.

Turbo Sweep 77 Plus

- Double dirt removal through disc brush and sweeping roller
- Softgrip push handle: ergonomic and non-slip
- Robust support wheels make uneven surfaces negotiable

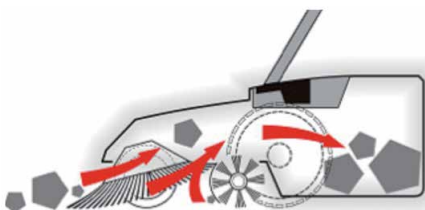

Battery-powered brush drive

Master Sweep 97 Plus

- Double dirt removal through disc brush and sweeping roller
- Softgrip push handle: ergonomic and non-slip
- Robust support wheels make uneven surfaces negotiable
- Large battery for long battery life

Clever double disc brush principle

Two counter-rotating disc brushes pick up the dirt over the entire rotating sweeping width and push it to the sweeping roller behind. The roller takes over and transports it into the large container. At the same time, the sweeping roller also picks up fine dirt.

Speedmatic Twister: An easy-to-manoeuvre push vacuum sweeper

The Speedmatic Twister is ideal for sweeping medium-sized areas. It is agile and compact, yet sweeps over a considerable width of 780 mm. The battery makes it quiet and emission-free. It is therefore also ideal for closed rooms and halls. But the all-round talent can do even more: Equipped with the optional carpet set, it reveals the ability to clean textile floor coverings.

Speedmatic Twister

- Easy to manoeuvre and use in confined spaces
- Quiet battery operation and integrated charger
- Ideal for closed rooms (emission-free)

- Service-friendly and robust
- Washable polyester filter for wet debris
- Carpet cleaning option

Carpet cleaning made easy

Customers who opt for the Speedmatic Twister no longer need a separate carpet cleaning unit. Converted with the optional carpet brushes, this machine cleans carpets as efficiently and effectively as it does hard outdoor flooring.

Speedmatic Tornado and Zyklon: Two powerful ride-on vacuum sweepers

The Speedmatic Tornado and the Speedmatic Zyklon are two powerful machines for large areas. They can deal with large amounts of waste spread across a large area efficiently and thoroughly. The Speedmatic Tornado even offers its customers the choice between quiet battery operation for indoor use and a powerful petrol engine for mastering ramps and steep gradients.

Speedmatic Tornado

FOR OUTDOOR AND
INDOOR USE

- Choice between powerful petrol engine and quiet battery version
- Two side brushes for optimum cleaning results
- Washable polyester filter for wet debris

Speedmatic Zyklon

FOR LARGE OUTDOOR
AREAS

- Ergonomic emptying
- Powerful diesel engine
- Washable polyester filter for wet debris

Ergonomic emptying

When the Speedmatic Zyklon's large dirt container is full, empty it without the use of muscle power. Simply actuate the lever and the dirt container is lifted hydraulically. You can then tip the contents effortlessly into the waste container.

Clean surfaces for improved safety (when walking)

From our manual sweepers to our Speedmatic vacuum sweepers – all our models ensure that loose dirt is removed from your surfaces in no time at all. Your employees and customers will find all underground garages, parking spaces, courtyards, warehouses and carpets free of dirt and safe to walk on at all times. Whatever the weather.

Detailed information

Models and Versions:
